### ABOUT ME

I have been working in the Construction Recruitment industry for the last 10 years, but it is not how it used to be and unfortunately I have fallen out of love with it. I have a passion for technology and the thought of finding a job in which I can use the most advanced languages and disciplines truly excites me. I love the thought of being able to learn something new everyday... for the rest of my life! I am currently just over half way completed in my course, and therefore only actually have one graded project at this time.

I will add the rest as they are returned to me after grading.

### QUALIFICATIONS / ACHIEVEMENTS

October 2019

#### **Accredited Diploma from Edinburgh Napier University (Code Institute) Full Stack Developer**

(estimated completion date) Currently studying a Full Stack Web Developer bootcamp course though Code Institute.

The course covers the following curriculum;

HTML5  
CSS3  
Bootstrap4  
JavaScript  
Python  
GitHub  
Data Management  
Agile Development  
Frameworks

I should have the whole course completed in the next month or so.

### EXPERIENCE

2009 - Present

#### **Recruitment Consultant**

I have spent the last 10 years working for a number of small to medium sized Construction Recruitment Agencies.

I specialise in the placement of graduates with construction related degrees into their first career jobs with reputable construction contractors across the UK.

I am currently Director of my own recruitment agency, however I am subcontracted to another company. I trade as their brand and I am able to utilise their back office support. As part of my deal I am solely responsible for their IT, including a rudimentary database (front end - Visual Studio, back end - PHP MyAdmin), VOiP telephone system, email and domain hosting and website.

## SKILLS

### Front-end

Bootstrap 4

HTML5

CSS3

JavaScript

JQuery

SASS

SCSS

### Back-end

PhpMyAdmin

MySQL
